

MOHAMED H. ALY

EXPERIENCE

E& (ETISALAT UAE)

Senior Software Developer

Dec 2025 – Present

- **Portal modernization:** Led migration of a 15-year-old Java Server Faces CIM portal to React with micro-frontend architecture, each module backed by a dedicated BFF microservice.
- **Component library overhaul:** Shrunk a bloated internal component library from 50 MB to under 5 MB by eliminating redundancy and dead code, preserving 100% of original functionality.
- **Algorithm optimization:** Optimized cell selection logic from $O(n)$ to $O(1)$, replacing linear scans with direct index lookups in interactive data grids.
- **Technical leadership:** Drove React adoption within a team transitioning from a legacy JSF codebase, establishing patterns and standards that accelerated delivery across all micro-frontend modules.

THE ADDRESS HOLDING

Frontend Engineer

Nov 2024 – Nov 2025

- **Internal system development:** Built and maintained internal CRMs and HRMs using Next.js, optimizing frontend performance to support 2000+ active users / daily administrative workflows.
- **Project ownership:** Spearheaded end-to-end development of a high-traffic property listing platform, authoring over 85% of production code for over 10,000+ active property listings.
- **SEO optimization:** Implemented Next.js SSR and dynamic routing strategies, driving a 35% increase in organic traffic and improving Core Web Vitals to a clean 100.
- **Legacy modernization:** Refactored a legacy Vue.js codebase to integrate with modern REST APIs, reducing client-side bug reports by 20% and ensuring seamless platform stability.

SIDEUP

Senior Frontend Engineer

Nov 2023 – Oct 2024

- **Mentorship & technical leadership:** Mentored junior engineers, establishing team-wide code review standards and TypeScript conventions that elevated overall code quality.
- **Hands-on architecture:** Designed complex dashboard features using React, Redux Toolkit, and TypeScript, optimizing state management to support real-time logistics tracking.
- **Stakeholder collaboration:** Partnered with product owners and backend engineers to translate business requirements into responsive UI components, ensuring seamless API integrations.
- **Process & CI/CD optimization:** Streamlined frontend workflows by setting up automated linting, pre-commit hooks, and CI/CD testing pipelines, reducing pull request review time.

Frontend Engineer

Feb 2023 – Oct 2023

- **B2C dashboard development:** Led frontend implementation of a next-generation shipping dashboard using React, TypeScript, and Bootstrap.
- **UX/UI excellence:** Partnered with designers to deliver intuitive, highly accessible interfaces.
- **Quality assurance:** Collaborated with QA to execute thorough testing, debugging, and performance tuning.
- **Adaptability:** Quickly mastered Next.js and Material UI to modernize legacy features and deliver consistent improvements.

ADVANCED COMPUTER TECHNOLOGIES (ACT)

Interface Specialist

Feb 2022 – Jan 2023

- **System integration:** Integrated hotel subsystems (Door Locks, IPTV, POS) with PMS solutions to streamline operations for global clients.
- **Agile collaboration:** Worked within agile teams to prioritize stakeholder requirements and ensure smooth delivery cycles.
- **Remote troubleshooting:** Diagnosed and resolved integration issues via log and error analysis, minimizing downtime.
- **Project coordination:** Led the integration of Oracle's Opera Web Services across 480+ IHG hotels globally within four months, coordinating complex technical dependencies and stakeholders.

SELF-EMPLOYED

Freelance Frontend Engineer

Jul 2021 – Present

- **Payment Dashboard:** Aman Accept Dashboard (Next.js) — a payment operations and analytics tool.
- **Corporate Website:** Beltone Company Website (Next.js) — SEO-optimized and performance-driven.
- **Fast-food Website:** Willy's Kitchen (Next.js) — a high-performance e-commerce ordering system.
- **Blockchain E-commerce:** D'art Space (Angular + crypto) — a blockchain-based art e-commerce platform.
- **Timely delivery:** Delivered client projects using Next.js, Vue, Angular, and TypeScript, with focus on scalability and SEO.
- **Team Collaboration:** Worked closely with designers and backend teams to deliver pixel-perfect, responsive UIs.
- **Client Relations:** Maintained ongoing client partnerships through reliable delivery and technical guidance.

TECHNICAL SKILLS

LANGUAGES & CORE: TypeScript, JavaScript, HTML5, CSS3, SASS, C, Python, PHP, Bash

FRONTEND & FRAMEWORKS: React, Next.js, Vue, Angular, Three.js, Ionic, Tailwind CSS, Bootstrap

BACKEND & ARCHITECTURE: Node.js, Express, NestJS, RESTful APIs, Serverless, Data Structures & Algorithms

DATABASES & ORMS: PostgreSQL, MySQL, MongoDB, Redis, Prisma, Firebase

CLOUD & DEVOPS: AWS, Azure, Google Cloud, Heroku, Docker, Git, GitHub, CI/CD, Biome

TOOLS & CONCEPTS: Figma, Jira, ClickUp, Artificial Intelligence, Machine Learning

EDUCATION

BACHELOR OF SCIENCE (B.S), MANAGEMENT INFORMATION SYSTEMS, GPA 3.1

July 2021

Arab Academy for Science & Technology & Maritime Transport (AASTMT)

PROJECTS & COURSES/CERTIFICATES

Projects and certifications available in my [online portfolio](#).
